

## Beside You

I stood beside you on that first time that we met  
We couldn't stop laughing then and really haven't yet  
You always see the funny side when others seem to frown  
My life is so much richer now with having you around

I'll kneel beside you whenever prayers are due  
I'll take whatever role I feel you ever need me to  
In health and sickness always there and right by your side  
Just happy to be with you throughout the whole dam' ride

I'll stand beside you to the ends of space and time  
For us to ever part would be tragic and a crime  
I know you're everything that I will ever need  
And if I ever made you sad, I know my heart would bleed

I'll walk beside you as our life grows and unfolds  
To care and guide you 'til we're both quite grey and old  
When life gets tough for you, you only need to say  
And I'll go on ahead of you to lead and smooth the way

I'll run beside you through the pouring rain and shine  
Joined at the heart and with your hand held tight in mine  
Two souls united in the love we've built and share  
And in the certain knowledge that we'll always really care

I'll stay beside you, please never doubt my word  
Any other path for me would simply be absurd  
You make me smile and bring sunshine into every single day  
You leave me breathless with your gentle, caring way

I'll be there right by your side until the bitter end  
You're my soulmate and my one and true best friend  
When heaven finally calls for us, I hope it takes me first  
Or else I'll surely follow as I know my heart would burst

I'll stay beside you throughout all eternity  
Beyond this life, just wait a while and I will make you see  
This love you made me feel for you can never fade or die  
I promise to be there always, if you will let me try

.....
