We have had many Past Lives, and in each we may have experienced many things that we will have brought through into this lifetime that can hamper us. Think about it.....

Have you ever wondered about your phobias.

Have you wondered why you over stock up on food.

Have you ever wondered why you don't like anything tight around your neck.

These are just a few things that could have come from your past lives.

Fascinated?

Then join me in this spiritually guided workshop, exploring a couple of your past lives in a safe environment, Creating healing. Investigate your safe place, working with all your senses.
