

## Bucket List

You're never too young for a wish list  
Whether you call it a "bucket" or not  
To list all the things you most want to do  
In all the time you've still got  
But none of us knows how long we have left  
The reaper's not swayed by our age  
He can come with a 1-way ticket for us  
Anytime, anywhere, any stage  
So the best thing is just to keep moving  
And try to make wishes come true  
By living and not just existing  
Until the book of your life's overdue

Express all your thoughts and your feelings  
And take pleasure in all that you do  
Give praise and encourage intentions  
Make apologies where they are due  
Don't ever let silliness fester  
And begin every day with a smile  
Appreciate all of your loved ones  
As we're all only here for a while  
Make plans but remember the present  
Is the gift truly yours to enjoy  
While the future's a promise oft broken  
Of time you may never deploy

So smile today and be happy  
Enjoying whatever it brings  
Try making a few new memories  
That are shared and are better than things  
A smile on the face is a greeting  
But a smile in the heart is a gift  
To lighten the whole of your being  
And causing your spirits to lift

## **Bucket List**

Sharing that with somebody special

Will make it all really worthwhile

Don't worry or fret for the future

It all starts with today so just smile
